

QurHealth launches patient care concierge programme QurOne

25 October 2021 | News

The brand aims to redefine healthcare in the country with seamless, hassle-free patient care and hyper-coordinated workflows

QurHealth, a healthcare data management startup, has announced the launch of QurOne, India's first value-based patient healthcare concierge programme guaranteeing medical expertise at the fingertips.

QurHealth is on a mission to offer cutting-edge healthcare IT solutions rooted in knowledge and innovative technologies such as analytics, big data, and artificial intelligence to ensure better healthcare for the patients. With the launch of QurOne, the platform aims to pave the way for a new beginning of healthcare in the country, promoting seamless patient care and hyper-coordinated workflow.

Leveraging QurOne's offerings, patients can consult with doctors they trust, monitor their health, learn about any comorbidities and symptoms, stick to healthy diet plans as per their requirements, and get real-time updates - all from the comfort of their homes. On the other hand, healthcare providers can use QurOne to diagnose patients, understand comorbidities, explain care plans, prescribe medication, provide medical assistance, schedule appointments, and chart diet regimens to treat their patients back to health swiftly.
