Navi Mumbai-based RRR Labs to participate in Bengaluru Tech Summit

11 November 2021 | News

The company has been at the forefront in serving the Indian vaccine and biosimilar manufacturing industry by introducing newly developed products and services

Navi Mumbai-based RRR Labs will participate in Bengaluru Tech Summit 2021. RRR Labs has served the Indian vaccine and biosimilar manufacturing industry by introducing newly developed products and services from closely associated and renowned overseas partners, backing it up with local support in all forms. The products include media, feeds and supplements for mammalian cell culture. Sample quantities are stored at our facility to respond quickly to R&D sample needs.

Dr Nagaraj Rao, MD, Rane Rao Reshamia Laboratories said, "We facilitate joint R&D projects between Indian and overseas companies and institutes in the broad field of biotechnology and life sciences, such as in the areas media optimisation, cell line evaluation, spent media analytics and API synthesis. We identify technology partners, especially in Germany/EU, for interested Indian companies in the field of life sciences. We are trusted representatives of overseas manufacturers of bulk drugs and excipients in India. We also manufacture organic fine chemicals by classical synthesis and biotransformation routes."
