Founder Speaks-

"This pandemic opened the country to the inadequate infrastructure of healthcare service providers in India. This sector definitely needs to evolve and reach a maturity level to ensure all parts of the country have access to healthcare. The multiple healthcare providers in the country are working together with the government to provide service at very minimal charges at the doorstep. We foresee many patients turning to online consultations and connecting with healthcare service providers and specialists."

- **Satish Kumar Singh, Founder, MY LYF CARE, Noida**
