TÃ?V SÃ?D to launch medical device testing lab in Bengaluru

10 December 2021 | News

The new integrated office and lab will open in 2023

TÜV SÜD has laid the foundation stone for a new state-of-the-art facility for testing and certifying electrical and electronic products and medical devices (active and non-active) to national and international standards in Bengaluru. The new integrated office and lab facility is scheduled for completion in early 2023.

The ground-breaking ceremony was held in the presence of Niranjan Nadkarni, CEO, TÜV SÜD South Asia, South East Asia, Middle East & Africa Region, and Ezhilan Neelan, Senior VP, Product Service, TÜV SÜD South Asia and other South Asia Management Members.

With an investment of €15 million, spanning across three acres and comprising 70,000 sq feet in Phase 1, the new integrated office and laboratory are located in KIADB Hitech Defense and Aerospace Park, Devanahalli, Bengaluru and will be the second lab facility in Bengaluru.

As a result of this investment, TÜV SÜD will be able to offer a one-stop testing and certification solution for most electrical and electronic products & medical devices.
