

HealthPlix unveils prescription summary dashboard for doctors

15 December 2021 | News

Offers a longitudinal view of disease progression that help doctors understand, assess and compare various treatment regimens

HealthPlix Technologies announced the release of the Prescription Summary Dashboard for doctors. The new feature release from the ROBIN suite, is an analytical software that sits on HealthPlix flagship product - EMR. With this second feature release – Prescription Summary Dashboard, doctors are now able to analyse their historical prescriptions within a few clicks enabling them to identify different cohorts of patients and the treatment given to them. Doctors may also use real-time analytics to stay ahead of the curve and make sure that their patients receive the best possible treatment (personalised care).

The Prescription Summary Dashboard is a research-oriented platform that helps deep dive into a patient's medical history. With a user-friendly interface, the dashboard provides an overview of complete practice with an aggregated analysis of prescriptions, allowing doctors to elevate their engagement with patients. Backed with analytics capabilities it allows doctors to find areas of improvement to drive better patient outcomes.

The health-tech start-up is backed by marquee investors such as Lightspeed Venture Partners, JSW Ventures, Kalaari Capital and Chiratae Ventures. In their latest round of funding, HealthPlix raised \$13.5 million as part of Series B funding, which was led by Lightspeed Ventures and joined by existing investors.
