InnoDx Solutions receives IVD license for RNA extraction buffer

13 January 2022 | News

Fast detection - InnoExtract buffer can extract RNA in less than 15 minutes

InnoDx Solutions, a startup based out of Gurugram that is focused on democratizing diagnostics for various communicable and non-communicable diseases, has become the first Indian company to receive IVD license for its InnoExtract Rapid Extraction Buffer which can replace traditional RNA extraction systems.

InnoExtract Rapid Extraction buffer is India's First IVD Extraction buffer with sensitivity and specificity of 100% for extracting RNA from COVID-19 samples as per the ICMR validation center report.

InnoExtract Rapid Extraction buffer can directly be used for extraction of RNA of SARS-COV-2 by Lysis of swab samples collected in the viral transport media (VTM) or universal transport media (UTM).
