

Dozee secures Rs 71 Cr to increase India's critical care capacity

18 January 2022 | News

Additional funding led by Gokul Rajaram

Bengaluru-based startup Dozee has raised Rs 71 crore in an additional funding round led by Doordash's Gokul Rajaram. The round also saw participation from existing investors Prime Venture Partners, 3one4 Capital, YourNest and other angel investors.

With this fresh funding, Dozee plans to solidify its leadership position in delivering connected HDUs with centralised patient monitoring and make critical care more easily accessible and available in Indian hospitals. The company will also use the funds to launch new products, continue with R&D and expand globally.

Dozee has set an audacious goal of partnering with over 1000 hospitals across India to help them upgrade critical care infrastructure through remote patient monitoring. It plans to install more than 50,000 step-down ICU beds with its contactless sensor and set-up 24x7 Central Monitoring Cells in these hospitals, enabling them to quickly augment the much required HDUs and ICUs.
