Mankind Pharma forays in critical care

19 January 2022 | News

Launches Saviour Mankind, a dedicated division for life-saving injectables

Mankind Pharma has announced its foraying into critical care. The company has launched Saviour Mankind, a dedicated division for life-saving injectables. The division has commenced operation with products ranging from Anti-infectives to Stroke & Trauma Management.

Through Saviour Mankind, the company will also introduce certain ‘1st time in India’ products which will provide additional armamentarium for Doctors and complement their efforts in tackling the challenges posed by increasing rates of antimicrobial resistance in India.

With this new division, Mankind Pharma is all set to partner with Doctors and ICU staff in their everyday practice. Frequent stock-outs of critical-care products during the COVID-19 pandemic is said to have urged Mankind Pharma to step in and support the medical fraternity with products that are vital in the resuscitation of critically ill patients.
