

IHL Care introduces 'Digital Health Centre'

20 January 2022 | News

The solution will provide customised health solutions with a capability of screening 20+ essential vital parameters

India Health Link (IHL) has launched a customised solution called Digital Health Centre. It is a first-of-its-kind integrated heart health programme that complements corporate wellness, providing customised health solutions.

The 'hPod' brought by IHL Care is a self-service ATM size health station. It is capable of screening (20+) essential vital parameters including key parameters like Blood Pressure, Temperature, Body Mass Composition, Pulse, SPO2, and ECG, without any paramedic assistance.

Dr Satyender Goel, Founder & CEO, India Health Link, says, "We have developed an integrated tailor-made Heart Health Programme to complement Corporate Wellness. IHL Care is the one-stop integrated health solution to fill the massive gap in piece-meal Corporate Wellness offering."
