There should be some steps taken with regards to the telehealth sector: Pyramed

26 January 2022 | Views

Dr Ketan Parikh, Founder, Pyramed

"Digitisation of health records will help in better data availability, tracking the disease, and formulating treatment strategies. Quality data collected can help patients maintain a robust history of ailments, which can save time and energy when they are referred to tertiary (speciality) hospitals. Telehealth is a boon, and we need to work on making it available to each one. There should be some steps taken with regards to the telehealth sector which is experiencing a boom during these unprecedented times. Telehealth can be a game-changer for Indian healthcare and usher us towards our goal of 'Health for all' at a much faster pace."
