

We are primed to withstand many challenges: Cytiva

01 February 2022 | Views

Raghavendra Goud Vaggu, General Manager of Cytiva South Asia

"As per the FM Nirmala Sitharaman's Union Budget, India's GDP is estimated to grow at about 9.27%. That means as a nation, we are primed to withstand many challenges brought about by the COVID-19 pandemic due to our higher penetration of vaccinations. All we need to do is maintain this strong position our economy finds itself in.

Since we are still in the midst of the Omicron wave, the FM observes that the speed of our prompt and all-encompassing vaccination campaign has helped greatly. She's also confident that with 'Sabka Prayaas', we'll continue on a strong growth path. During Amrit Kaal, our government aims to achieve the vision for India@100 that was unveiled by the Prime Minister Narendra Modi during his Independence Day Address."
