Budget 22 is visionary and focused on implementing major steps: CORE Diagnostics

03 February 2022 | Views

Dinesh Chauhan, CEO, CORE Diagnostics

"We congratulate the government for presenting a dynamic budget with a major focus on strengthening the healthcare sector. Budget 22 is visionary and focussed on implementing major steps to revitalise the healthcare industry including driving healthcare penetration underpinned by technology thrust and access. The introduction of National Tele Mental health to access quality mental health services is a much-appreciated move, considering the rise of pandemic accentuated mental health problems in India. While there has been no significant announcement related to the diagnostics sector, it is encouraging to see the government focusing on the PPP model and digital health which will further ensure accessibility and availability of quality healthcare services in remote locations."
