Cadila Pharma offers solution to treat dry skin conditions

04 February 2022 | News

The lotion is effective against xerosis, ichthyosis, atopic dermatitis, psoriasis, skin ageing, and co-therapy with corticosteroids

Cadila Pharma has launched lotion to treat dry skin conditions. Laglo Soft Lotion comes with a unique technology that enhances moisturisation and restructures the skin.

Launching another product in the skincare category, drug major Cadila Pharmaceuticals has launched an intensely moisturising formula to treat dry skin conditions.

Christened Laglo Soft Lotion, the formula is used to treat dry skin conditions and associated disorders. It is proven to be effective in treating xerosis, ichthyosis, atopic dermatitis, psoriasis, skin ageing, and co-therapy with corticosteroids.

The formula's unique technology not only leads to enhanced moisturisation but also restructures the skin.

The Laglo Soft Lotion is based on the "3D Aquaporin Hydraconcept" and contains 'Aquaxyl' that boosts Hyaluronic Acid Production and increases the genetic expression of the Aquaporin AQP3 membrane for long-lasting hydration for intensive moisture retention and barrier component booster.
