Voxtur Bio unveils neutralising antibody test kit for COVID-19

14 February 2022 | News

Has a rapid turnaround time of 15 minutes

Mumbai-based in-vitro diagnostics (IVD) company Voxtur Bio has launched an advanced point of care rapid Neutralising antibody test kit VoxPress COVID-19 for detecting neutralising antibodies.

VoxPress COVID-19 neutralising antibody is a lateral flow test that detects IgG antibodies to spike protein of the SARS-CoV-2 virus, from a small finger prick of blood in only 15 minutes.

VoxPress COVID-19 is affordable and comes with a rapid turnaround time (15 minutes), high specificity (94 per cent) and sensitivity (100 per cent) and long shelf life of 24 months.

It has advantages over the other methods in many ways such as no specific laboratory requirements, no need for specific training of the analyst along with field applicability, easy scalability and mass screening possibility.
