

Imaginarium ties up with 3D printing giant Ultimaker

22 February 2022 | News

The tie-up will offer complete solutions in 3D printing and focus on production-grade applications for various industries

Imaginarium, a global leader in 3D Printing solutions and advanced manufacturing technology, introduced its newest desktop and industrial 3D printer range in partnership with 3D printing giant Ultimaker. Netherlands-based Ultimaker offers a wide range of award-winning 3D printers, open-source software, expansive material marketplace, and support. This is a key milestone in the company's strategy to be the leader in industrial 3D printing for manufacturing and adds to the company's growing portfolio of 3D printing solutions in the Indian market.

With Ultimaker, the company will have the added advantage of a varied range of state-of-the-art equipment. These will offer complete solutions in 3D printing and focus on production-grade applications for various industries and deliver quality results time and again. The 3D printers being compatible with around 200 materials, Imaginarium is introducing the most cost-effective way for businesses to adopt in-house 3D printing.

This proposition brings Ultimaker's whole range of desktop 3D printers like Ultimaker S5, Ultimaker S3, Ultimaker S5 Pro Bundle, and the base model of Ultimaker 2+ Connect to India.
