Azelis strengthens pharma presence in India

23 February 2022 | News

Partners with Roquette

Belgium headquartered Azelis has announced a new agreement with Roquette for the distribution of their pharmaceutical cellulose product range in India. Roquette is a global leader in plant-based ingredients, a pioneer of plant proteins and a leading provider of pharmaceutical excipients.

Roquette’s products, including its plant-based excipients, combined with Azelis’ dedicated application laboratories and formulation proficiency, will allow both companies to provide customers and partners with tailor-made, innovative solutions.

Through this collaboration, Azelis India is expanding its comprehensive product portfolio with the inclusion of Roquette’s Microcrystalline Cellulose (MCC) and Croscarmellose Sodium (CCS) products. The new agreement is effective immediately.

Azelis was appointed as Roquette’s distribution partner for the plant care market in the Asia Pacific in 2020, and Food & Health in China in 2021.
