SRT partners with Boston Micro Fabrication for precision micro 3D printing

01 March 2022 | News

Makes SRT one of the only global companies providing technologies of global digital manufacturing brands

Boston Micro Fabrication (BMF), USA has partnered with Mumbai-based Shree Rapid Technologies (SRT) and marks the entry of BMF2 micron series, 10-micron series and 25-micron series 3D Printers in India.

With Micro 3D Printing applications spread across a wide variety of industries, the BMF printers, having the combination of ultra-high resolution, accuracy, and precision allow for more intricate, exact, and replicable parts.

With the ability to reach resolutions as low as 2 microns, industries such as medical, electronics, microfluidics will be further benefited by being able to print stents to prosthetics to surgical planning, electrical components, connectors and tools like Lab-on-Chip and other devices.
