67% Indians believe in domestically manufactured vaccines than foreign ones: Survey

02 March 2022 | News

1106 respondents participated in the online survey from across nine metro cities of India

Saizen Global Insights & Consulting in collaboration with HEAL Foundation recently conducted INDIA VAX-SCENE Survey on vaccine perception in February 2022.

In the online survey, 1106 respondents participated from across nine metro cities of India, with a mean age of 28.7 years. Among them, 45 per cent were women.

Of them, 98 per cent has belief in COVID-19 vaccines. And 78-79 per cent are optimistic about life getting back to normal in the next two to five years from COVID-19 impacts, wherein 83 per cent believes that vaccines play a critical role in getting back to normal.

In the survey, 67 per cent of Indians believe that ‘Made in India’ vaccines are safer than other vaccines developed in foreign countries. And over 90 per cent of Indians believe that the vaccine’s role is vital to fight against COVID-19 whereas over 85 per cent believes that COVID-19 vaccines are safe and effective, reposing their hope in the important role vaccines have been playing to fight the pandemic.
