- Obtained patent for first of its kind social finance product, that facilitates lending and borrowing among people in a social circle
- Growth plans include establishing SaveIN as the country's foremost healthcare finance platform

Founder Speaks-

"Buy Now Pay Later (BNPL) programmes have taken the credit sector by storm, with the business anticipated to expand to \$50 billion in India by 2028. BNPL's current offerings have mostly been limited to financing online purchases in impulse-driven areas such as clothes, cosmetics, gadgets, food, and so on.

Over 70% of Indians prefer private treatment, so it's no wonder that healthcare costs account for \$40 billion in out-of-pocket spending each year. It also doesn't help that insurance penetration is less than 1% of GDP. This places a great deal of financial hardship on a huge number of people, especially in the case of emergency or unanticipated demands. In the healthcare industry, Buy Now Pay Later (BNPL) services have a growing popularity. Customers and medical providers alike will benefit from this tremendous opportunity and much-needed solution."

- Jitin Bhasin, Founder & Chief Executive Officer, SaveIN, Gurugram
