

Zeon Lifesciences signs MoU with DPSRU for research activities

05 April 2022 | News

The goal of the collaboration is to conduct R&D projects to investigate formulation and product development in the fields of nutraceuticals, phytopharmaceuticals

Zeon Lifesciences signs a Memorandum of Understanding (MoU) with Delhi Pharmaceutical Sciences & Research University (DPSRU) to establish collaboration for academic interaction and research advancement in the specified fields, as well as to share facilities and expertise.

DPSRU and Zeon will conduct collaborative research activities at DPSRU encompassing pharmaceutical technology, synthesis and analytical techniques, pharmacotherapeutics, standardisation of herbal actives and protocols adopted to comply with the regulatory milieu of the region/country concerned.

The goal of this collaboration is to conduct R&D projects to investigate formulation and product development in the fields of nutraceuticals, phytopharmaceuticals, and Ayurveda.

Zeon Lifesciences and DPSRU will be conducting clinical trials as per AYUSH or DCGI guidelines, applicable for selected formulations. Both entities will also conduct studies to compare the prevailing regulations, approaches and challenges while registration of drug products.
