

Hitachi India sets up oxygen plant at Vimhans Nayati Super Specialty Hospital

13 April 2022 | News

The plant will offer 97 per cent level of O2 purity

Hitachi India has collaborated with Vimhans Nayati Super Specialty Hospital and set up an oxygen plant of 150nm³ (cube) capacity on the premises of the hospital in Delhi. The plant will achieve a 97 per cent level of O₂ purity, conforming to the industry standards, and offering the best facility to patients.

Bharat Kaushal, MD, Hitachi India, "Commissioning an independent O₂ PSA plant would help cut down the dependability of hospitals on external oxygen resources and would make the health institute self-reliant."

"With the commissioning of the O₂ plant we can supply uninterrupted oxygen to critical patients, those in ICUs, neonatal and pediatric units, emergency wards, and provide the best medical care," said Dr SN Chaudhry, Chairman, VIMHANS.
