

India Health Link signs MoU with U GRO Capital

20 April 2022 | News

The MoU will strengthen the integrated human-centric preventive health screening ecosystem in India

India Health Link (IHL), a digital health and medical device start-up, has signed a Memorandum of Understanding (MoU) with U GRO Capital, a listed MSME lending fintech platform to expand the deployment of their first-of-its-kind human-centric phygital healthcare ecosystem, and to strengthen the human-centric preventive health screening ecosystem and to expand its footprint in India.

IHL has collaborated with U GRO Capital to ease the adoption of its integrated healthcare screening ecosystem under the RBI lending programme so that the doctors and hospitals don't have to upfront the entire cost. Owing to this lending facility, preventive healthcare delivery will reach the maximum number of people who are deprived of the accessibility of primary and preventive care in the remotest part of India.

U GRO has received Term Lending support from State Bank of India, Indian Overseas Bank & Canara Bank for onward lending under this scheme of RBI.
