Mylab appoints Rajesh Patel as Executive Director of In-Vitro Diagnostics Business

09 May 2022 | News

Patel will be responsible for spearheading the IVD testing equipment and reagent business in Mylab

Mylab Discovery Solutions announced the appointment of Rajesh Patel as the Executive Director – in-vitro diagnostics (IVD) business. In his role, he will be responsible for spearheading the IVD testing equipment and reagent business at Mylab by setting up production units, overseeing the related research and development and the launch of the products across the domestic and overseas markets.

Patel brings over 30 years of deep and diverse experience in the area of sales, marketing and business development in various healthcare segments including Pharmaceuticals, Clinical Research Organizations, Clinical Trials and IVD/ Medical Devices. He was previously working as the CEO of IVD business at Trivitron Healthcare and drove its growth through innovation.

Patel has held positions of increasing responsibilities in several reputed companies including Pfizer Limited, Meril Diagnostics, Agappe Diagnostics, Transasia Bio-Medicals Limited and Quest Diagnostics. Rajesh was closely involved in building the business right from conceptualisation to planning and then to implementation. He also knows biochemistry, haematology, molecular biology, immunology, critical care, coagulation and general laboratory consumables.
