

Eppendorf India adds new capability at Pipette Calibration Facility in Chennai

12 May 2022 | News

The system can calibrate 8-channel / 12-channel micropipette in less than 30 minutes

Eppendorf India has added a new capability at Pipette Calibration Facility in Chennai with the installation of 'Speedcal mobile', first-ever installation in India, to calibrate 8-channel or 12-channel micropipettes in less than 30 minutes.

The patented and unique pipette calibration system includes 12 weighing systems for fast, precise and efficiently calibrating multichannel pipettes up to 12 channels. State of the art proprietary software is used to calibrate pipettes with minimal human intervention. There is absolutely no possibility for data correction or manipulation. It can support calibration of all brands of micropipettes.
