Bharat Rubber Works to participate in PharmaPack Europe 2022

16 May 2022 | News

The company will display a wide range of products at the expo

Bharat Rubber Works (BRW) will exhibit rubber stoppers, droppers, and packaging for dermaceutical products such as glass droppers, lotion bottles, caps, and more at PharmaPack Europe 2022 on May 18 and 19, 2022 at Paris Expo, Porte de Versailles. Pharmapack is the European hub for the pharmaceutical packaging and drug delivery device industry, and exhibitors showcase their products to a wide set of audiences and prospective customers.

Siddharth Shah, Director, Bharat Rubber Works, says, "We are pleased to participate in this global exhibition that will allow us to share our recent developments of advanced quality and explore potential partnerships."

Over the next few days, BRW and their on-ground team will focus on getting their products in front of a global market while also bridging the gap between European drug manufacturers and Indian pharmaceutical packaging manufacturers.
