Exergen Corp launches TAT-2000 temporal artery thermometer

23 May 2022 | News

The thermometer comes with a seven-year warranty

Exergen Corporation has launched the made for India, TAT-2000 Temporal Artery Thermometer at the recently held Medical Fair in Mumbai. Exergen creates non-invasive temperature measurement devices providing lower cost, higher accuracy, no invasiveness, and greater reliability combined with phenomenal ease of use.

Ellen Minkels, Senior Director of International Business Development said, " We are confident that our range of innovative products, including the TAT-2000 which has been specifically created for the Indian market will disrupt the marketplace, and will be adopted by leading healthcare institutions, hospitals, clinics and elderly homes in the next two to three years."

The TAT-2000 has been specially created for the Indian market with its focus on procurement, being highly attractive in terms of cost of ownership, performance, and functionality, with a seven-year warranty which is almost considered a lifetime warranty.
