Mylab unveils at-home pregnancy test kit PregaScreen

09 June 2022 | News

Priced at Rs 55, PregaScreen comprises a pregnancy stick device and a dropper

Pune-based Mylab Discovery Solutions has launched PregaScreen, an at-home pregnancy test kit that allows women to detect their pregnancy status themselves.

With the launch of this test kit, the company marks its foray into the female healthcare segment. It plans to launch a range of products in this category in the coming months.

Priced at Rs 55, PregaScreen offers a comfortable, easy-to-use and reliable test method for women to confirm their pregnancy after they have missed their first period.

This at-home rapid test kit provides highly accurate results within just a few minutes with 99.99 per cent accuracy and can be purchased over-the-counter from local pharmacies across India. Each kit comprises a pregnancy stick device and a dropper.
