Agilent Technologies to host â??Future Lab Summitâ?? in Ahmedabad

30 June 2022 | News

The summit will showcase an array of Agilentâ??s future-ready analytical solutions

Agilent Technologies is hosting ‘The Future Lab Summit’ in Ahmedabad, Gujarat on July 15, 2022. The theme of the event is ‘Transformation of analytical laboratories to keep up with industry developments.’ The summit will be live-streamed, and more than a thousand scientists and researchers from commercial, scientific, and research communities worldwide are expected to attend.

“The Future Lab Summit aims to build a platform for the scientific community to share their views and suggest strategies about the ‘Lab of the Future’ concept, where innovation meets sustainability,” added Dr Samir Vyas, Country General Manager, Agilent India.

The event will showcase Agilent’s latest platforms including, the new LC/MS and GC/MS quadrupole mass spectrometers among others, which represent the latest revolution in Agilent’s over half a century of history in mass spectrometry. The new LC/TQ and GC/TQ products are expected to offer built-in instrument intelligence that can simplify lab operations.

The summit will also feature workshops for participants to discuss the ongoing and future regulatory challenges in pharma, food, and applied chemical industries with industry leaders and experts from the pharma and applied market organisations.
