- Won a small grant and award for social impact by Techcamp in 2019 by US Public Affairs Department & Cultural Vistas
- Awarded for innovation and creativity on World IP Day by Enobe IP and WIFE powered by Startup India and DST in 2018

Founder Speaks-

"Till now around 1530 people enrolled in our Fertility Coach Program, 90% enrolled users achieved their fertility goals within 3 months of joining. We have 5 lac plus monthly reach from our digital footprint. By opting our program 200+ women successfully got pregnant.

With the new ART bill, Indian government is more focused on patient care during infertility treatment and this will bring more value to couples trying to conceive. There will be increasing demand for holistic and patient friendly tech enabled platforms to make virtual care a given practice."

- Gitanjali Banerjee, Founder, Fertility Dost, New Delhi
