Fourth-generation pinless computer navigation system to aid in joint replacement

01 July 2022 | News

Fortis Bone & Joint Institute, Shalimar Bagh will use the system for joint replacement

Fortis Bone & Joint Institute, Shalimar Bagh today launched a dedicated state-of-the-art joint replacement care centre. The centre is backed by advanced technological equipment and will cater to personalised care and rehabilitation of patients. The institute will be backed by an advanced fourth-generation pinless computer navigation system, which will help in knee surgery using the latest cutting-edge technology to make the implants placed last longer, reduce complications and aid in faster recovery.

The newly launched Institute will also cater to fast-track knee replacement surgeries, including painless and stitch-less procedures.
