India Health Link partners with Canopi

15 July 2022 | News

To strengthen the integrated human-centric preventive health screening â??Phygitalâ?? Ecosystem in India

India Health Link (IHL), a digital health and medical device start-up, is joining hands by signing a Memorandum of Understanding (MoU) with Canopi for its hPod financing sanction for ($14M+) – a supply chain finance and trade finance marketplace, to expand the deployment of their first-of-its-kind integrated, human-centric, preventive health screening ‘Phygital’ healthcare ecosystem in India.

IHL has collaborated with Canopi to qualify hPod under medical equipment financing and ease the adoption of its integrated healthcare screening ecosystem. Owing to the lending facility of Canopi, the preventive healthcare delivery will reach the maximum number of Indians who are deprived of the accessibility of primary and preventive care in the remotest part of the country.

Canopi has designed its modules keeping small businesses in mind. At Canopi, there is no waiting period for a loan, and it requires minimum documentation and provides the quickest approvals.
