Research-to-launch cryopreservation bank opens in Chennai

15 July 2022 | News

The lab aims to serve biopharmaceutical companies seeking to outsource the whole gamut of supply-chain management

Bridging the growing supply-chain gap in preservation and maintenance of biospecimens by leveraging advanced technologies, Cellutions BioStorage, a research-to-launch Cryopreservation Bank was inaugurated in Chennai.

Brainchild of India's leading health-preneur, Mayur Abhaya - Cellutions BioStorage is a comprehensive biomaterial storage and logistics company that aims to serve biopharmaceutical companies seeking to outsource the whole gamut of supply-chain management, across the spectrum of the product life cycle.

The company through a range of services will provide transparency into the entire chain of custody and condition of the biospecimens. The newly-launched facility is equipped with world-class infrastructure spread across over 25,000 square feet. It is co-located in a separately marked area at the same licensed premises as LifeCell's current laboratory at Chennai.

As part of this launch, Cellution Biostorage also announced its maiden collaboration with LifeCell International, India's leading stem cell bank, as its first client.
