Countdown begins for BioSpectrum India Excellence Awards 2022

12 August 2022 | Features

To highlight the achievements of companies across various sectors for FY21-22

Amidst the pandemic, one more financial year concluded with lots of figures, calculations, positives and negatives, all related to finance and money, telling us where exactly the organisation stands today compared to the previous years.

Everybody is interested in knowing the organisation’s performance – independent as well as compared to others across various sectors- Biopharma, BioSupplier, BioServices, Industrial Enzymes, Medtech and Diagnostics.

To highlight the achievements of the companies in India across these sectors, BioSpectrum has started working on the next set of ranking special issues, after the sucess of BioSpectrum Excellence Awards 2020 held in March 2021.

Companies will be ranked on the basis of their revenues and other achievements that took place in the last financial year- 2021-22. The winners will be felicitated at our 'Awards Night' in 2022.

So what are you waiting for...

Time is running out! Click below to fill the form related to your sector-
