MaxiVision introduces Teneo 317 Model 2 excimer laser for vision correction

21 July 2022 | News

To provide customised treatments for a wide range of patients

MaxiVision Eye Hospital has introduced Technolas Teneo 317 Model 2 (Teneo M2). The Teneo M2 is an advanced, high-performance excimer laser, designed with expert German engineering design.

It provides customised treatments for a wide range of patients, correcting presbyopia, myopia and hyperopia, and astigmatism. Unique to the TENEO M2, the SUPRACOR treatment is a true varifocal LASIK for presbyopic patients looking for improved quality of vision without glasses for most daily activities.

MaxiVision is the first hospital in Telangana to launch such an advanced device. With integrated technology for precise treatments, the Teneo M2 has features such high-speed eye tracking and an ergonomically designed bed for patient comfort and seamless, fast surgical procedures.
