

Patient undergoes midline redo open heart surgery using Ofilatting Saw by Stryker

22 July 2022 | News

The 48-year-old patient was operated at Jaslok Hospital & Research Centre, Mumbai

Doctors at Jaslok Hospital & Research Centre, Mumbai successfully performed midline redo open heart surgery on a 48-year-old heart failure patient. The patient was suffering from advanced heart failure and successfully underwent a heart transplant four years after being operated upon for PTCA and Coronary artery bypass surgery at another hospital.

Dr Hemant P Pathare, Additional Director, Department of Heart & Lung Transplant surgery and his team used Ofilatting Saw by Stryker to treat the patient who was suffering repeated episodes of breathlessness, and swelling of the entire body, puffy face, and loss of appetite.
