Synchron Research Services reported an estimated revenue of 1063 crore in 2010 the asknown compared to previous year's estimated revenue of 10579 crore! It is a leading known CRO in India, which provides a broad range of clinical research services from phase I to phase IV, including bioavailability, bioequivalence, pharmacokinetic, pharmacodynamic studies, dermato-pharmacokinetics, bioanalysis, statistical analysis, data management and pharmacovigilance. It has a 30-bed facility in Bangkok called Bio-Innova Synchron Research to serve the Asia Pacific region, which was formed by a joint venture between Bio-innova and Synchron Research. Synchron also acquired Innovance, an Ahmedabad-based start-up CRO having a clinical research facility. The new clinical facility is spread across 18,000 sq ft on a single floor, with three different volunteer housing areas. The new 80 beds will be an addition to the already existing 90 beds in the existing facility, thus totaling to 200 beds across Asia.

Clinigene International, the full service clinical research arm of biotech major, Biocon, registered a turnover of 1748 crope in FY 2010-11 as wn compared to 139 crore in the FV 2009 10. In the year 2010, studies conducted by Clinigene were successfully audited by the USFDA and EMA without Form 483 or critical findings. In addition to the standard service platforms, the company has identified several more specialized areas, such as patient-based early studies, complex BA/BE studies and bio-analytical services, where customers are now seeking CRO support. The new areas of focus for Clinigene include biomarker development, data management and pharmacovigilance. Clinigene is India's first CAP accredited central laboratory and has also received NABL accreditation. The company has evolved and adapted its capability platforms and service offerings against a background of continued macro market pressures.
