

Pfizer buys Global Blood Therapeutics for \$5.4 B

08 August 2022 | News

To enhance presence in rare haematology

Pfizer and Global Blood Therapeutics (GBT) have entered into a definitive agreement under which Pfizer will acquire GBT, a biopharmaceutical company dedicated to the discovery, development and delivery of life-changing treatments that provide hope to underserved patient communities, starting with sickle cell disease (SCD).

Under the terms of the transaction, Pfizer will acquire all the outstanding shares of GBT for \$68.50 per share in cash, for a total enterprise value of approximately \$5.4 billion, including debt and net of cash acquired.

GBT developed Oxbryta[®] (voxelotor) tablets, a first-in-class medicine that directly targets the root cause of SCD. Oxbryta was approved in the United States in November 2019 and is also approved in the European Union, United Arab Emirates, Oman and Great Britain. Net sales for Oxbryta were approximately \$195 million in 2021. Leveraging its global platform, Pfizer plans to accelerate distribution of GBT's innovative treatment to parts of the world most impacted by SCD.

In addition, GBT is developing GBT021601 (GBT601), an oral, once-daily, next-generation sickle hemoglobin (HbS) polymerization inhibitor in the Phase 2 portion of a Phase 2/3 clinical study. GBT601 has the potential to be a best-in-class agent targeting improvement in both hemolysis and frequency of vaso-occlusive crisis (VOC). GBT's promising pipeline also includes inclacumab, a fully human monoclonal antibody targeting P-selectin which is being evaluated in two Phase 3 clinical trials as a potential quarterly treatment to reduce the frequency of VOCs and to reduce hospital readmission rates due to VOCs. Both GBT601 and inclacumab have received Orphan Drug and Rare Pediatric Disease designations from the U.S. Food and Drug Administration (FDA). If approved, GBT's pipeline and Oxbryta have the potential for an SCD franchise that could achieve combined worldwide peak sales of more than \$3 billion.
