Health-tech startup Clinikk expands footprint into newer markets

08 August 2022 | News

Opens 18 state-of-the-art primary care centres across Bengaluru and Hyderabad

Clinikk, a Bengaluru-based health-tech startup, has launched its path-breaking, all-inclusive health subscriptions that will bring down the medical cost to zero by integrating health insurance with its high-quality, comprehensive outpatient care delivery model. Clinikk is on a mission to transform healthcare and create health equity for the 600 million Indians who are without proper access to quality primary healthcare in today's day and age.

Clinikk subscribers can walk into any of Clinikk's 18 primary care centres called Clinikk Health Hubs in Bengaluru (16) and Hyderabad (two inaugural, more coming soon) and avail of unlimited, medical care with ease. Clinikk network locations have been mapped to ensure that care is reachable within 15 minutes.

As an industry first, Clinikk offers an all-inclusive plan that offers families unlimited access to out-patient care (OPD) care as well as Rs 5 lakh cashless hospitalisation insurance cover, for a monthly subscription fee of just Rs 500.
