New deal strengthens digital health firm Congenicaâ??s presence in India

11 August 2022 | News

Congenica announces partnership With Avesthagen

UK-based Congenica, a digital health company that enables precision medicine through its world-leading diagnostic decision support platform for genomic data, has partnered with Bengaluru-based Avesthagen, a biotechnology major that specialises in predictive, preventive and personalised healthcare through the convergence of food, pharma and population genetics.

Congenica's automated and AI-powered platform will provide genomic analysis and reporting for Avesthagen's Avgen Diagnostics, which offers whole genome and exome-based diagnostics for predictive and preventive healthcare throughout India.

Congenica enables Avesthagen's customers to rapidly interpret next-generation sequencing data with confidence, significantly accelerating the time to diagnosis, improving patient outcomes and reducing the burden on healthcare systems.
