Omics Data Automation unveils Bengaluru facility

16 August 2022 | News

The new office will enable ODA to scale its market-leading framework technology globally

Omics Data Automation (ODA), a leading provider of technology for healthcare data management and analysis, announced the opening of its newest office in Bengaluru, Karnataka in response to growing global demand for its software and services.

India is a priority market for ODA as well as a source of key commercial and development partnerships for the company. The new office will be the company's second formal location and will enable ODA to scale its market leading framework technology globally accelerating the launch of its solutions for federated learning and causal inference.

"The Bengaluru office is ODA's first service point outside the US and represents the strategic expansion of our brand inIndia and around the world. Together with our employees working remotely across the globe as well as those in ourBeaverton, OR office, the new facility will enable us to accelerate product development and deliver services throughout the region," saidNoah Nasser, CEO, ODA.
