

Manipal's American University of Antigua to commence Pre-Med programme

12 September 2022 | News

The Pre-Med to MD programme is for 6.5 years

Manipal's American University of Antigua (AUA) will commence the current batch of its two-year Pre-med programme on the campus of Manipal Academy of Higher Education, Karnataka from October 10, 2022. American University of Antigua (AUA) is fully owned by the Manipal Education & Medical Group.

Students aspiring to pursue a medical degree in the US can now start their journey from India right after the completion of senior high school, on the Manipal campus. The selection process deems the senior high school graduates from English medium instruction, with a score of 65 per cent and above in the mandatory subjects of physics, chemistry and biology eligible to apply for this programme.

The Pre-Med to MD programme is a 6.5 years programme designed for high school graduates and non-traditional students who are all set to pursue an international career in medicine. The students complete the first two years of the programme and then move to the Manipal's American University of Antigua, College of Medicine to complete the next 4.5 years: 2.5 years of pre-clinical sciences in the state-of-the-art campus in Antigua, the remaining 2 years of clinical rotations across the US, the UK and Canada.
