

Tata 1mg partners with Seekho.ai for healthcare skill management

22 September 2022 | News

The partnership will help to roll out industry-certified programmes in healthcare and other sectors

Tata 1mg has partnered with Seekho.ai, an artificial intelligent (AI)-powered upskilling platform backed by Sequoia Capital, to roll out industry-certified programmes in healthcare and other sectors.

Over the past few years, people's interest in health and medicine has skyrocketed. Terms like Dolo, Remdesivir, RT-PCR etc. became a part of our regular conversations. Indians are more health conscious than ever before and the demand for healthcare services, well-being products, spaces and equipment has also increased multi-fold, paving the way for numerous employment opportunities in sectors like nursing, pharmacy, diagnostics and healthcare management.

The healthcare sector in India is one of the sectors seeing the highest growth in skilled workforce requirements and Seekho-Tata 1mg partnership seeks to impart industry-relevant skills and behavioural training to meet this demand.
