DFPCL launches range of hand and surface disinfection solutions for healthcare sector

27 September 2022 | News

Cororid range of disinfectants contain Indian Pharmacopoeia (IP) grade IPA and is manufactured in FDA compliant facilities

Deepak Fertilisers And Petrochemicals Corporation Ltd. (DFPCL) has announced the launch of Cororid disinfection solutions designed to cater to the specific needs of hospitals, clinics, laboratories, and other medical and healthcare set-ups.

Cororid® is a certified, high-quality Iso Propyl Alcohol (IPA) based formulation that is the world's most preferred active ingredient in hand sanitizers and other disinfection products.

With global organisations such as WHO and CDC stressing the role of IPA in fighting off various microorganisms, DFPCL's Cororid Disinfection Solutions range has been designed to meet stringent industry standards and is amongst the very few fortified with Indian Pharmacopoeia (IP) grade IPA.

Through the launch of this product range, DFPCL aims to further strengthen its market presence in speciality chemicals to meet the demands of the pharma and medical community.
