Qure.ai appoints Dr Shibu Vijayan as Medical Director - Global Health

28 September 2022 | News

The new posting reiterates Qure.ai's efforts to strengthen its strategic offerings and accelerate global expansion in the public healthcare sector

Mumbai-based startup Qure.ai has appointed renowned global health expert, Dr Shibu Vijayan as its Medical Director for Global Health Practice. The company enjoys clear leadership in the global health space and the new addition of Dr Vijayan to its helm will bolster its partnerships with strategic change-makers in public health, manifold.

Dr Vijayan is a senior clinician in Community and Public Health Services. He has 25 years of experience in developing, monitoring, and evaluating public health projects, including developing healthcare-related proposals in both private and not-for-profit organizations. He is also an accredited International general Tuberculosis (TB) expert by the TB team hosted by WHO and Stop TB Partnership.

Prior to Qure.ai, he was at PATH and has also worked with the WHO as Technical Consultant for the TB Control Program in India and was associated with Medicines Sans Frontiers (MSF, Netherlands) as a field Epidemiologist in Ethiopia.

“Qure’s AI and digital solutions are targeted towards accelerating Universal Health Coverage. This dynamic team is doing stellar work towards improving global healthcare access and I am excited to be part of the journey. We will continue to strive towards optimizing global health practices and expand our footprint further to reach remote communities and their unmet medical needs”, said Dr Shibu Vijayan, Medical Director, Global Health, Qure.ai.

The company is one of the leading artificial intelligent (AI) solutions providers to be recommended by WHO, in the absence of a human reader. Qure.ai is present in 600+ sites across 60+ countries, including the UK, US, Southeast Asia, Latin America, Australia, and Africa.
