CitiusTech announces investment and strategic partnership from Bain Capital Private Equity

23 October 2022 | News

For enabling healthcare organisations to become more care-efficient, personalised, and data-driven

CitiusTech, a leading provider of technology and consulting services to healthcare and life sciences companies, has welcomed Bain Capital Private Equity as an investor, joining existing shareholder Baring Private Capital Private Equity (BPEA) EQT who acquired a majority stake in CitiusTech in 2019.

As the healthcare industry continues to embrace digital and artificial intelligent (AI)-driven solutions, CitiusTech has made strong investments in proprietary platforms, accelerators, and scalable, repeatable solutions to address industry needs such as value-based performance, technology modernisation, patient engagement, medical imaging, digital front door, and digital health transformation.

Recent acquisitions of FluidEdge and SDLC Partners has enabled CitiusTech to offer deep healthcare domain consulting and end-to-end digital transformation solutions across its key markets - medtech, payers, providers, and life sciences.
