Mylab sets up advanced genetic lab and cancer research centre for MUHS in Pune

11 November 2022 | News

Offering a wide portfolio of tests to analyse DNA, RNA, chromosomes, proteins

The Maharashtra University of Health Sciences (MUHS) has launched a state-of-the-art genetic laboratory and cancer research centre, designed by Mylab Discovery Solutions, in Pune. The facility was inaugurated by Bhagat Singh Koshyari, Governor of Maharashtra.

The cutting-edge laboratory will offer a wide portfolio of tests to analyse DNA, RNA, chromosomes, proteins through biochemical, cytogenetic, molecular methods to evaluate and diagnose congenital disorders, prenatal disorders, hematologic and oncologic disorders.

Pune-based startup Mylab has been transforming the diagnostics landscape through its market-leading, innovative solutions. The company is committed to apply deep knowledge in science and technologies to create solutions that help resolve challenges in healthcare.
