Eurofins to set up new analytical lab at St. Josephs University in Bengaluru

24 November 2022 | News

A multi-year collaboration for training students

Eurofins India and St. Joseph's University, Bengaluru have signed a multi-year collaboration to create a state-of-the-art analytical chemistry lab at the University.

This collaboration paves the way for active partnership between Eurofins and the School of Chemical Science for providing hands-on experience to master's level students of St. Josephs University on the latest instrumentation for analytical chemistry such as HPLC, LCMSMS, GC, GCMS, ICPMS, etc. and making them industry ready by the time they graduate.

As part of this collaboration, Eurofins will support curriculum development in analytical chemistry and instrumentation, provide visiting faculty and offer paid internships and possibilities of full-time employment to the graduates of the University, at various Eurofins companies all over India.

Neeraj Garg, Regional Director, South Asia and Middle East, Eurofins, while signing the MOU said, "The company is working with industry to support quality initiatives and R&D programmes. Enhancing the academic rigour and providing hands-on experience to the scientific manpower of the country is a critical initiative that Eurofins is supporting as a part of its efforts."
