IIM Raipur inks MoU with Digital Health Academy for launching new online course

29 November 2022 | News

Global digital health course launched for healthcare professionals

A Memorandum of Understanding (MoU) has been signed between Digital Health Academy (an SBU of Digital Health Associates) and the Indian Institute of Management (IIM) Raipur to start the first-of-its-kind online course on Digital Health.

The Certified Digital Health Professional (CDHP) course will be a year-long, completely online course specifically designed for healthcare and management professionals.

The CDHP course is designed for Physicians, Allied Healthcare Professionals, and professionals in healthcare administration and life sciences. The aim of this course is to enhance the competence level with regard to the use of digital tools across the continuum of care.

Ideated in 2020 by Digital Health Academy, CDHP is the result of two years of research, brainstorming, and extensive consultation with around 54 global leaders. The academy will have the world's foremost leaders and pioneers as faculty.

Through CDHP course, Digital Health Academy wants to bridge the gap between the healthcare professional & application-oriented Digital Health. Segregated into three levels: Basic, Advanced and Professional, the course will cover the theoretical and practical implementation of digital health technologies.

Apart from getting access to many offerings from the digital health ecosystem, at Digital Health Academy, the students will be entitled to join the global alumni of health professionals and become a part of the impact-full Digital Health Professionals network across the globe.
