Hexaware Technologies expands global life sciences and healthcare IT consulting practice

12 January 2023 | News

AcquiresÂ businesses of Highpoint Solutions and MobiquityÂ

Mumbai-based Hexaware Technologies has announced the significant expansion of its global life sciences and healthcare industry capabilities by completing the integration of the recently acquired Highpoint Solutions and Mobiquity businesses.

Clients will benefit from an enhanced consumer, patient, healthcare provider and employee experiences, streamlined paths from molecule to market and ultimately improved productivity and financial performance.

Hexaware's client base includes leading global biopharma, emerging-pharma, cell and gene therapy and healthcare organisations to help leverage technology to drive their business, launch products and improve the delivery of global healthcare with the ultimate objective of bringing smiles to patients.

The talented team at Hexaware has partnered with clients to deliver leading-edge life sciences solutions, including designing the world's first FDA-approved Digital Pill; launching 45+ different brands in life sciences; first IT services firm supporting COVID-19 rescue studies globally; delivering de-centralised clinical trials; and co-engineering the human data sciences cloud
