Garuda Aerospace teams up with Narayana Health for transporting bio-medical supplies

17 February 2023 | News

To transport biomedical supplies using the newly launched Sanjeevani drone

Garuda Aerospace has announced its partnership at Aero India 2023 in Bengaluru with Narayana Health, one of India's leading healthcare providers. Garuda Aerospace forays into the medical sector for transporting bio-medical supplies using their newly launched- Sanjeevani drone.

The partnership between the two aims to revolutionise the delivery of critical and emergency medical supplies including samples for diagnosis in times of high traffic and other challenging conditions.

The use of drones in the healthcare industry has proven to be a game changer by saving valuable time and improving outcomes. Garuda Aerospace introduces the Sanjeevani drone that will reduce time and increase efficiency for medical deliveries.

With the help of Garuda Aerospace’s Sanjeevani drone, Narayana Health will be able to transport bio-medical supplies quickly, ensuring that patients receive timely diagnoses and treatments. The drones will also help to provide emergency healthcare to the ones in remote and underserved areas as well.

Dr Devi Shetty, Chairman and Executive Director, Narayana Health, said, "In the first phase, drones will be deployed in Bengaluru to transfer bio medical samples from Narayana Health City and HSR Layout on a daily basis. In the next 1 year, our network of 21 hospitals will have these services."

During the pandemic, Garuda Aerospace used its emergency drones to deliver medicine and vaccinations to hospitals in partnership with Swiggy. The company's White Knight drones delivered essential medicines and vaccinations to Bengaluru hospitals for ISRO in 2021, demonstrating their capability in providing timely and efficient medical delivery.
